DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 3 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Tajima et al.

3. Tajima et al. disclose a surface acoustic wave filter in which a plurality of pairs of comb electrode patterns are formed on an upper surface of a chip substrate made of a piezoelectric material, wherein opposing portions of two comb electrode patterns that form a pair are not sharp. (See figure 1)

Allowable Subject Matter

4. Claims 9, 12 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 1-2, 4-5, 7-8, 10-11 and 13-14 are allowed.

6. The following is an examiner's statement of reasons for allowance:

The prior art of record teach a surface acoustic wave filter having a plurality of comb electrodes formed on an upper surface of a chip substrate made of a piezoelectric material and dummy electrode patterns. However the prior art of record fails to teach, disclose, or suggest, either alone or in combination the SAW filter comprising a high-resistance pattern formed to surround a peripheral portion of the chip substrate on an upper surface side thereof, and a plurality of patterns formed to connect the high resistance pattern to the respective comb electrode patterns. The prior art of record fails to teach the dummy electrodes pattern formed on the upper surface of the chip

Art Unit: 2834

of record fails to teach the dummy electrodes pattern formed on the upper surface of the chip substrate to be adjacent to a second pattern of electrodes and connected there to. Therefore, the limitations contained on claims 1-2, 4-5, 7-8, 10-11 and 13-14 are considered to be in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

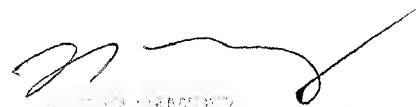

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
